The Return of the Dart-Board Newsletter!

After taking off the past year for maternity leave, I am thrilled to be back with the ACCU-DART team to bring you all the latest information about our products and services.

The Dart-Board Newsletter is the ideal way to learn what's new with ACCU-DART, including the latest product information, handy tips and tricks, case study profiles, upcoming events, and much more.

If there is something you would like to see profiled in any upcoming issues, or have any other feedback to improve our communications with you, our resellers, please feel free to contact me at barb@accu-dart.com.

Thank you,

Barb Kwolek

The Health of ACCU-DART

As with humans it is a good idea to have regularly scheduled checkup to see how we are doing. These checkups not only give us an opportunity to treat any minor illnesses, but are beneficial to ensuring a long and successful life.

As many of you may be aware I have been suffering from back problems for the last several months. Throughout this

time I have taken action, not only help me with my health issues; but to make sure that you continue to get the best software, support and solutions that we can provide.

At ACCU-DART we have always recognized the importance of quality and support. We provide excellent products, quick turnaround on customizations and responsive 24/7 support. We know how important ACCU-DART is to your customers' operations. If you have noticed any issues with your ACCU-DART experience, please accept my apologies. We are always looking at improving the quality of the solution that we are providing. I am hopeful that with your feedback we will be able to improve our ability to offer ACCU-DART solutions.

A big part of a checkup for ACCU-DART involves feedback from you, our customers. The reason we develop and support this system is to help you. I encourage you to email me any suggestions and comments that you may have. It is only through your feedback that we can take steps to improve our health.

We had an excellent year at ACCU-DART. We continue to have excellent acceptance in North America and have recently had successful implementations in Australia. The ACCU-DART team, and that includes my full time involvement, are looking forward to working with you for many more years by providing the solutions you need.

Thanks

Irwin Ash
President

Quick Questions on What's New with ACCU-DART

Are you current with the most recent releases of the ERP systems?

The latest versions of the ERP systems that we support include:

ACCU-DART

INVENTORY MANAGEMENT SOLUTIONS

Sage Accpac 6.0
AccountMate 8.1 and 8.2
Sage Pro 2011

Is your new Windows Mobile version compatible with my ERP system?

ACCU-DART for Windows Mobile is currently available for Sage Accpac and AccountMate users. For more information on our Windows Mobile solution, please click [here](#).

How can I learn about the latest ACCU-DART features and see ACCU-DART in action?

We offer one-on-one web demos for our resellers as product training. We also support our resellers with end-user web demos that are tailored to their clients' specific concerns, and do our best to help our resellers with the sales process.

To book a web demo, please contact Justin at justin@accu-dart.com.

What are the newest ACCU-DART modules?

We have two new ACCU-DART modules for Sage Accpac clients:

Material Usage module: our first PJC module. It allows users to allocate items to a specific job.

IC Adjustment modules: allows users to either increase or decrease their inventory.

What are my options for Sage Accpac clients who are in manufacturing industries?

ACCU-DART currently integrates with AutoSimply's Manufacturing Order system for Sage Accpac.

AutoSimply's Manufacturing Order (M/F) is an easy-to-use manufacturing solution. It is fully integrated with Sage Accpac ERP, and covers BOM maintenance, entry of manufacturing orders, issuance/return of materials, work-in-progress tracking, receipt of assembled goods and production costing.

With integration with ACCU-DART, users will be able to update this essential manufacturing information directly in Sage Accpac ERP through hand-held, radio-frequency bar code scanners.
