

Improve Inventory Accuracy and Traceability with Direct Integration

ACCU-DART Case Study

Big 8 Beverages Limited is a food manufacturer based in Stellarton, Nova Scotia. Managing the inventory of both raw materials and finished goods was filled with issues. All inventory was manually recorded into Sage 300 ERP the day after production was counted and verified. This caused countless accuracy errors, which in turn led to issues when trying to forecast the correct quantities for future production orders. As a food manufacturer lot control traceability was additional priority.

Already extremely satisfied with their ERP system's ability to track and process day to day information, Big 8 Beverages needed an inventory management system to eliminate the manual data entry that was causing so many inaccuracies. They contacted their Sage 300 ERP reseller – DB Group Consulting Inc – to find a solution.

ACCU-DART leverages the existing accounting system to improve inventory accuracy. ACCU-DART validates receiving, production, order fulfillment and updates directly to Sage 300 ERP including lot control traceability records

Client:

Big 8 Beverages

Location:

Stellarton, Nova Scotia

Type of Business:

Food Manufacturing

Reseller:

DB Group Consulting Inc

“ACCU-DART enabled Big 8 Beverages Ltd to have an accurate real time inventory of raw materials and finished goods while reducing the time consuming manual data entry and processing procedures that were in place.”

- DB Group Consulting Inc.

– there is no second database to maintain, no second system to reconcile. When a transaction is posted through ACCU-DART, it is posted in the accounting system in real time.

Implementing ACCU-DART was easy for Big 8 Beverages Limited. DB Group Consulting Inc quickly installed the software and got everything up and running. Training the warehouse staff on the new scanners was also quick. ACCU-DART was also customized to offer a one-scan feature in order to record inventory production and traceability to minimize prompts on the scanners and improve timely information and improve productivity.

ACCU-DART enabled Big 8 Beverages Ltd to have an accurate real-time inventory of raw materials and finished goods. Since implementing ACCU-DART, they have reduced time-consuming data entry and processing procedures. By updating inventory information directly into Sage 300 ERP in real-time, Big 8 Beverages is now able to accurately forecast inventory for future production orders.

With ACCU-DART validating and updating directly into Sage 300 ERP, Big 8 Beverages is able to keep control of their inventory, in real-time.

About DB Group Consulting Inc
