

ACCU-DART Module Descriptions

Communication Modules

Concurrent RF Users

Concurrent Radio-Frequency User Licenses

Desktop Version

Software emulator -- ideal for fast data entry and/or training & documentation.

Advanced Modules

Ship Sales Orders

Scan items (& quantity) to be shipped, review the total shipment, and, when complete, ship the sales order

Ship SO with Lots

Add-on module that allows the user to ship lot items with the Ship Sales Order module

Ship SO with Serial Numbers

Add-on module that allows the user to ship serialized items with the Ship Sales Order module

Ship SO with Bin Tracking¹

Add-on module that allows the user to ship items and update bins with the Ship SO module & Orchid's Bin Tracking software

Ship Kit Components

Add-on module that allows the user to ship kit components with the Ship Sales Order module

FreightPlus² Integration

Allows the user to enter freight information, which is then updated directly with FreightPlus shipping software.

Receive Purchase Orders

Allows the user to scan the items (& quantity) being received; review the total delivery, and when complete, post the receipt of goods

Receive PO with Lots

Add-on module that allows the user to receive lot items with the Receive PO module

Receive PO with Serial Numbers

Add-on module that allows the user to receive serialized items with the Receive PO module

Receive PO with Bin Tracking¹

Add-on module that allows the user to receive items and update bins with the Receive PO module & Orchid's Bin Tracking software

Ask for Serial or Lot Optional Fields

Add-on module that allows the user to update the Sage Accpac Optional Fields for Serial Numbers or Lot Control

Physical Inventory Count

Allows the user to scan the items & quantities for physical counts. Uniquely, ACCUDART is configured to allow multiple users to perform a physical count at once.

Physical Count with Lots

Add-on module that allows the user to count lot items with the Physical Count module

Physical Count with Serial Numbers

Add-on module that allows the user to count serialized items with the Physical Count module

Physical Count with Bin Tracking¹

Add-on module that allows the user to count items in their bins with the Physical Count module & Orchid's Bin Tracking software

In-Transit Warehouse Transfers (two-step)

2 modules that allow the user to transfer items from one warehouse to another in two-steps. First an item is transferred out of a warehouse; then, upon receipt, the items are added in to the second location.

IC Warehouse Transfers (one-step)

Allows the user to transfer items from one warehouse to another in one-step.

Warehouse Transfers with Lots

Add-on module that allows the user to transfer lot items with the 1-step or 2-step Warehouse Transfer modules

Warehouse Transfers with Serial Numbers

Add-on module that allows the user to transferserialized items with the 1-step or 2-step Warehouse Transfer modules

Warehouse Transfers with Bin Tracking¹

Add-on module that allows the user to transfer items in their bins to different locations with the 1-step or 2-step Warehouse Transfer modules & Orchid's Bin Tracking software

ACCU-DART Module Descriptions

Change Warehouse	When setting up the ACCU-DART users, a default warehouse is assigned. This function allows the user to change the warehouse in which they are working
IC Shipments	Allows the user to indicate what items have been shipped and generate an IC Shipment in real-time
IC Shipments with Lots	Add-on module that allows the user to ship lot items with the IC Shipments module
IC Shipments with Serial Numbers	Add-on module that allows the user to ship serialized items with the IC Shipments module
IC Shipments with Bin Tracking ¹	Add-on module that allows the user to ship items and update bins with the IC Shipments module & Orchid's Bin Tracking software
IC Receipts	Allows the user to indicate what items have been received and generate an IC Receipt in real-time
IC Receipts with Lots	Add-on module that allows the user to receive lot items with the IC Receipts module
IC Receipts with Serial Numbers	Add-on module that allows the user to receive serialized items with the IC Receipts module
IC Receipts with Bin Tracking ¹	Add-on module that allows the user to receive items and update bins with the IC Receipts module & Orchid's Bin Tracking software
IC Assemble/Disassemble	Allows the user to assemble and disassemble kit items
Vendor Receipts	Allows the user to indicate what items have been received and generate a Vendor Receipt, without requiring a PO#
Customer Return (RMA)	Allows the user to record a return (RMA)
Commit Sales Order	Allows the user to enter item & quantity for a Sales Order; ACCU-DART will commit those values. This function can be used in conjunction with SO Ship Commit.
Commit SO with Serial Numbers	Add-on module that allows the user to ship serialized items with the Commit SO module
Commit SO Kit Components	Add-on module that allows the user to ship kit components with the Commit SO module
Ship SO Commit	Allows the user to ship committed items. This function can be used in conjunction with the Commit Sales Order function.
Ship SO Commit with Lots	Add-on module that allows the user to ship lot items with the Ship SO Commit module
Ship SO Commit with Serial Numbers	Add-on module that allows the user to ship serialized items with the Ship SO Commit module
Ship SO Commit with Bin Tracking ¹	Add-on module that allows the user to ship items and update bins with the Ship SO Commit module & Orchid's Bin Tracking software
Ship SO Commit Kit Components	Add-on module that allows the user to ship kit components with the Ship SO Commit module
FreightPlus ² Integration	Allows the user to enter freight information, which is then updated directly with FreightPlus shipping software.
Bin Transfers ¹	Allows the user to transfer items from one bin to another with Orchid's Bin Tracking software
Picking ¹	Allows the user to pick items from bins and move them to the "Shipping Bin" with Orchid's Bin Tracking software

ACCU-DART Module Descriptions

Put Aways ¹	Allows the user to move items from the main "Receiving Bin" to physical bins with Orchid's Bin Tracking software
Pick by SO ¹	Allows the user to scan a Sales Order, and then pick the items and move them to the "Shipping Bin" with Orchid's Bin Tracking software
Print Forms	This module will allow the system to automatically print forms upon posting, including Invoices, Packing Slips, etc.
Add Items to Sales Order	Allows the user to add items that already exist in the system to a Sales Order
Split/Combine Lots	Allows the user to take items from part of an old lot # and move it to another lot #.
Shipment Header & Detail Optional Fields	Allows the user to enter optional field information to either the Shipment Header or Detail Lines. *Optional fields must be activated in Sage Accpac.
Collect Bar Codes	Allows the user to assign a bar code for a specific item
AutoSimply⁴ Integration Package	Integrates ACCU-DART with AutoSimply Manufacturing software; Modules include: Issuance of Materials, Return of Materials, Receipt of Assembled Goods, and Closing MO

MISys³ Integration

Purchase Order Receipt	Allows the user to receive MISys POs from suppliers with MISys Manufacturing software.
Finished Goods/WIP Assembly from BOM	Allows the user to assemble MISys finished goods and/or WIP from Bills of Material with MISys Manufacturing software
Physical Inventory Count	Allows the user to count MISys inventory and post reconciliation with MISys Manufacturing software
Location Transfers	Allows the user to transfer MISys stock between two MISys locations with MISys Manufacturing software
Bin Transfers	Allows the user to transfer MISys stock from one bin to another at a single MISys location with MISys Manufacturing Software
Item to (Accpac) Sales Transfer	Allows the user to transfer MISys finished goods to Accpac Sales inventory with MISys Manufacturing Software
Complete MO	Allows the user to complete the Manufacturing Order with MISys Manufacturing software
Change MISys Plant	When setting up the ACCU-DART users, a default plant is assigned. This function allows the user to change the plant in which they are working
MISys Bin Inquiry	Allows the user to enter a bin # and view the items and quantities within the bin with MISys Manufacturing software
MISys Item/Bin Inquiry	Allows the user to enter an item # and view the bin # and quantities with MISys Manufacturing software

ACCU-DART Module Descriptions

MISys Item/Location Inquiry

Allows the user to enter an item # and view the locations and quantities with MISys Manufacturing software

Inquiry Modules

Item/Location Inquiry

Allows the user to enter an item # and view the locations and quantities

Item/Bin Inquiry¹

Allows the user to enter an item # and view the bins and quantities with Orchid's Bin Tracking software

Bin/Item Inquiry¹

Allows the user to enter a bin # and view the items and quantities with Orchid's Bin Tracking software

Item/Lot Number Inquiry

Allows the user to enter the item, and view the lot numbers and quantities

Item/Serial Number Inquiry

Allows the user to enter the item, and view the serial numbers assigned

Item/SO Inquiry

Allows the user to enter an item # and view the sales orders which contain the item

Sales Order Inquiry

Allows the user to enter a sales order and view the details

Item/PO Inquiry

Allows the user to enter an item # and view the purchase orders which contain the item

Purchase Order Inquiry

Allows the user to enter a purchase order and view the details

Customer Inquiry

Allows the user to enter a customer # and view the current sales order information

Vendor Inquiry

Allows the user to enter a vendor # and view the current purchase order information

1 - Users must purchase Bin Tracking from Orchid Systems. Visit www.orchidsystems.biz

2 - Users must purchase FreightPlus Software. Visit www.frtplus.com

3 - Users must purchase MISys Software. Visit www.mysisinc.com

4 - Users must purchase AutoSimply Software. Visit www.autosimply.com
