Happy Holidays from Executive Concepts Inc.

## Introducing ACCU-DART for AutoSimply

Bring efficiency, simplicity, and accuracy to small and medium-sized manufacturers with ACCU-DART's integration with AutoSimply.

AutoSimply's Manufacturing Order (M/F) is an easy-to-use manufacturing solution. It is fully integrated with Sage Accpac ERP, and covers: manufacturing order entry, release & tracking, material issuance & return, work-in-progress tracking, consumption & scrap, MO receipt & costing, master production scheduling, material requirements planning, and MO lot tracking.

With integration with ACCU-DART, users will be able to update this essential manufacturing information directly in Sage Accpac ERP through hand-held, radio-frequency bar code scanners.

**Real Time Updating** - ACCU-DART allows the staff on the shop floor to instantly carry out AutoSimply's functionality. **For example:** when receiving assembled goods, the plant employee simply scans the goods being received, and ACCU-DART will - through AutoSimply's functionality - automatically update this information directly into the Sage Accpac system.

**Direct Integration** - Both ACCU-DART and AutoSimply believe strongly in direct integration:

both systems read and post data directly into Sage Accpac. There is no second database to maintain, no second set of data to reconcile. This makes the solution simple and easy to use for manufacturers,

**Functionality** - ACCU-DART provides real-time, radio-frequency updates of AutoSimply's functionality in one module set. This includes: Issuance of Materials; Return of Materials; Receipt of Assembled Goods; and Closing MO.

By updating in real-time directly to the Sage Accpac Data, ACCU-DART and AutoSimply allow manufacturers to get control of their inventory and improve their operations.

For more information on ACCU-DART and AutoSimply, please contact [info@accu-dart.com](mailto:info@accu-dart.com) or visit [www.autosimplify.com](http://www.autosimplify.com).

## ACCU-DART Reviews Needed for Sage Partner Solution Source

Development Partner

SILVER

The [Sage Partner Solution Source](#) is a great resource for Resellers and potential clients to search for and gather information on third-party products for Sage solutions, including Sage Accpac ERP and Sage Pro ERP. Through this site, you can find detailed information on ACCU-DART, including product descriptions, feature sheets, case studies,

articles, and more.

One key area of the Sage Partner Solution Source is product reviews. For this we need the help of our resellers. We invite you to send your clients to visit [www.sagepss.com](http://www.sagepss.com) and add reviews of the ACCU-DART system. These reviews add an essential element to our listing, allowing future clients to see what other successful resellers and end-users think of our solution.

We hope you encourage your clients to take a few minutes to add a review to our listing, to help build a resource for all ACCU-DART resellers and clients. Thank you for your continued support of our solution!

We also welcome any feedback you or your clients may wish to share with us directly. The ACCU-DART team greatly values the comments/suggestions from our resellers & end-users, as this important feedback helps to improve our product offering, marketing & technical support, and much more. Please feel free to contact us at [info@accu-dart.com](mailto:info@accu-dart.com) with any comments or suggestions.

## Bin Tracking for Sage Accpac Now Available!

Bin Tracking functionality allows you to track specific inventory information, and know where items are located at all times. By incorporating radio-frequency bar code scanning, the warehouse staff can instantly update the system as they handle each item in real time. ACCU-DART is proud to announce that integration with the Bin Tracking solution from Orchid Systems is now available!

**Seamless Integration** - ACCU-DART updates inventory and bin information directly to Orchid Systems software and with Sage Accpac. There is no additional database to maintain and reconcile.

**Essential Real Time Updating** - Tracking Bin information in real-time is essential to make the most of this crucial data.

**The old way:** Moving goods from one bin to another, but only updating the database every few hours (or at the end of the day) leads to inaccurate and out-of-date information, that is not as meaningful to your business

**The ACCU-DART way:** By easily scanning bin information with each transaction through ACCU-DART and Orchid Systems Bin Tracking software, you will have the most up-to-date information on your inventory at all times.

**Extensive Functionality** - Orchid Systems and ACCU-DART have developed numerous modules to meet your bin tracking needs. It is also easy to add bin tracking to your existing ACCU-DART installation. Modules include:

- Ship Sales Orders with Bins
- Receive Purchase Orders with Bins
- Physical Count with Bins
- Bin Transfers Picking
- Put Aways
- Pick by SO
- and more...

ACCU-DART's ability to record bin information - in addition to the standard Sage Accpac data - and to update the database in real-time from the warehouse floor, provides a cost-effective realistic solution to tracking crucial bin information.

For more information on ACCU-DART's Bin Tracking functionality, please contact [sales@accu-dart.com](mailto:sales@accu-dart.com).

Users must purchase Bin Tracking from Orchid Systems. Visit [www.orchidsystems.biz](http://www.orchidsystems.biz).

## Happy Holidays from Executive Concepts Inc!

2009 was a good year for ACCU-DART and Executive Concepts Inc. We are so proud to be able to help our resellers provide a solution that saves time & money for their clients.

We wish you a very Happy Holidays and a Happy New Year from all of us at Executive Concepts Inc.
