ACCU-DART for Windows Mobile

Webinars for ACCU-DART for Windows Mobile

Upcoming Events: Sage Insights

Upcoming Events: TPAC Registration

Coming Soon: ACCU-DART for Windows Mobile Version

The ACCU-DART team has been hard at work developing a new version of our innovative inventory management software that is compatible with Windows Mobile handheld devices. This product will soon be available for Sage Accpac ERP clients.

ACCU-DART for Windows Mobile opens up a world of options for the hardware best-suited to your clients' business. In addition to the Worth Data

radio-frequency handheld devices, **ACCU-DART is now compatible with the Motorola/Symbol brand scanners**, including the MC 9090 radio-frequency devices.

With Windows Mobile, ACCU-DART clients have the **freedom to choose** the best hardware solutions to suit their business. There are virtually limitless options to choose from. As such, we strongly

encourage our resellers to extensively research the options available for each of their clients. As always, you know your clients' best, we are not the experts when it comes to picking the right hardware solution for their individual needs.

Clients who already own Motorola/Symbol devices running Windows Mobile version 5 or 6 may be able to use their existing equipment with this new version of ACCU-DART.

If you have a particular hardware device in mind for your clients, please contact us to confirm if it's been certified to work with the ACCU-DART system. For more information on getting hardware certified, please contact Justin at justin@accu-dart.com.

Unlike the 900 MHz scanners from Worth Data, installation of the Windows Mobile devices can be more complicated, due to the specific hardware requirements. **To help facilitate easy implementation**, the ACCU-DART team has partnered with a company called **Ant Colony** to provide assistance to our reseller channel. Ant Colony helped us develop the system, and can aid in all areas of implementation, from hardware configurations, network set-up, to software installation. For more information, please visit: www.theantcolony.com.

We are also currently looking for beta sites for ACCU-DART for Windows Mobile. If your client may be interested in acting as a beta site, please contact us ASAP.

For more information on ACCU-DART for Windows Mobile, please contact justin@accu-dart.com.

Upcoming Events: Sage Insights 2010

Sage Insights 2010 is fast approaching! We are very excited to be exhibiting once again at this informative and important conference for Sage Resellers.

This will also be your first opportunity to see the new ACCU-DART for Windows

Mobile version for Sage Accpac ERP! **Please visit us at Booth #501** to see a live demonstration of the newest addition to our solution.

Sage Insights 2010 will take place May 17-20 in Denver, Colorado. For more information, please visit www.sagesoftwareinsights.com.

Upcoming Events: TPAC 2010

The ACCU-DART team is thrilled to be returning once again to the Third-Party Advantage Conference (TPAC), August 29-31, 2010 in Vancouver, BC.

TPAC is the conference that "showcases third-party products that work with Sage Accpac ERP and Sage

CRM. Every product shown is potentially useful for you in providing a solution to your clients and prospects".

In addition to exhibiting at TPAC, we will also be presenting a session on ACCU-DART. Don't miss out on this exciting opportunity to see ACCU-DART in Action!

To register for TPAC, [please download this form](#). For more information, visit www.tpac.biz.
